### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The closest prior art, Wong teaches nanoparticles comprising an active agent and a surface modifier. Wong, however, teaches the use of cationic surfactants as cloud point modifiers (see column 10). The cloud point modifier is being used to prevent dissociation of the surface stabilizer from the nanoparticles during sterilization (Col. 10, lines 30-38). Wong does not expressly teach cationic surface stabilizers become associated with nanoparticulate active agents in an amount to cause nanoparticles to adhere to a biological surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 14-76 and 93-110 are allowed.
